MOME:

- Scholarship recipient of the New National Excellence Program in the 2021/22 academic year - to support the research program

Re-built Glass

Brand concept:

Vision:

Creating design products that not only decorate your home, but also use waste during their production, which protects our planet from the incineration of useless waste and the emission of carbon dioxide!

Mission:

Conscious selective collection of architectural glass waste and its secondary life in valuable DESIGN products.

Core values:

Creation of handmade, sustainably designed contemporary industrial art, design products, architectural elements from architectural glass waste.

Brand description:

On the one hand, this project is about how we can rethink the process of reducing the amount of waste. On the other hand, about how to transform the original waste glass, how we can make this changed, new material visible. To explore how beautiful and surprising surfaces and textures can be created from them, in artistic works, design products and architectural elements. In my planning, my goal is to create a design in which I tried to take the aspects of sustainable development into account, and in order to protect the ecology, I preferred planning for the entire production cycle.

Re-built Glass Panel Also in individual colors

320 EUR/m²

Re-built Glass Brick

Also in individual colors. Size: 19x19x7 cm

26,3 EUR/pcs

**Re-built Glass minimal glass bowl
design bowl dimensions: 17x49 cm and 21x42 cm**

150 EUR/pcs

Re-built Glass round bowl
Size: 38 cm circle, 6 cm high

150 EUR/pcs

Balaton collection:

I shape the glass with heat, and I do not make two identical pieces in terms of form, only in terms of color.

The shape of each piece is special, unrepeatable thanks to the technological process. No two are alike.

Balaton Kollekción wants to reflect the whimsy and uniqueness of our lake in both its colors and shapes.

With each melting, the forms take on different, special undulations and shapes. Like Lake Balaton.

Deák Design Balaton collection

Glass vase size: 26 cm high. Its width varies: 32-36 cm. Sole width: 12 cm

210 EUR/pcs

Colors: turquoise, dark blue, topaz, orange

Deák Design Balaton collection
Floor lamp size: 150-152 cm high

300 EUR/pcs

Colors: turquoise, dark blue, topaz, orange

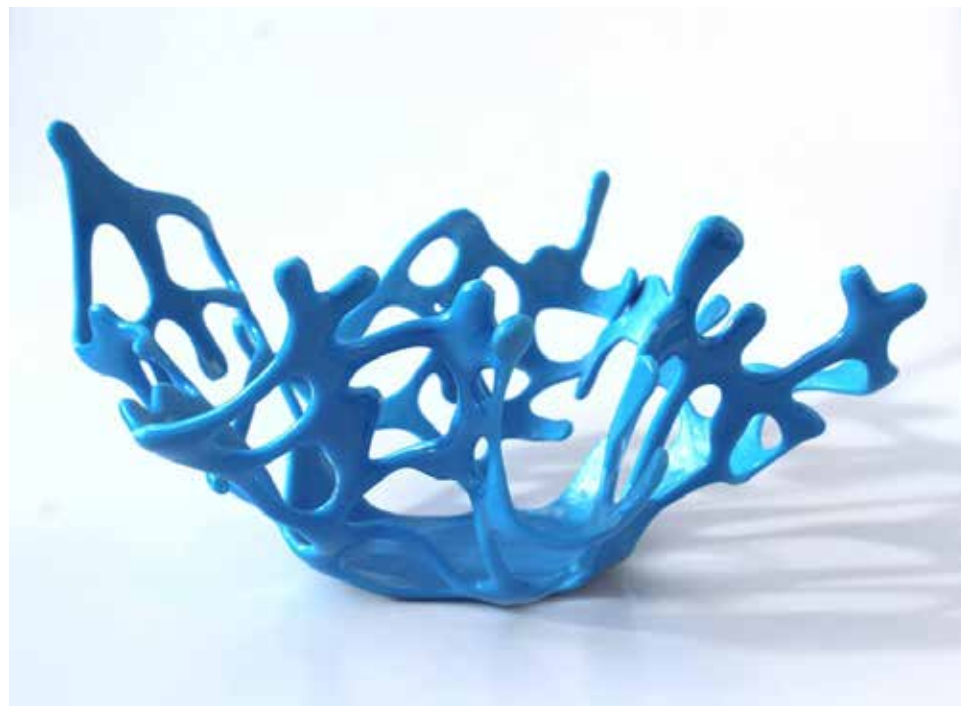

Deák Design Coral Glass Bowl Collection

Coral Glass Bowl Collection:

The pieces of my coral collection are made from recycled material.

The decorative bowls are reminiscent of corals with their shape, which make up the fragile but all the more important ecosystems of the seas, the coral islands. Their existence is increasingly endangered due to environmental pollution caused by human activity. The decorative bowl draws attention to the protection of the natural world, as environmental damage initiates processes that endanger humanity as a whole.

Deák Design Coral Glass Bowl Collection

160 EUR/pcs
Colors: black, white, clear water, turquoise

Deák Design

Glass vase collection

Glass vase collection:

Unique handcrafted glass bowl made with fusing and sintering technology.

Each piece is unique, thanks to the technological process. No two are alike.
I shape the glass with heat, and I do not make two identical pieces in terms of form, only in terms of color.

Deák Design Glass vase collection

Size: Height, Variable 23-26 cm. Its width also varies: 35-40 cm and 12-25 cm

210 EUR/pcs
Colors: Orange, black, white and Turquoise, white

Deák Design

Oxides and Precious Metals Collection

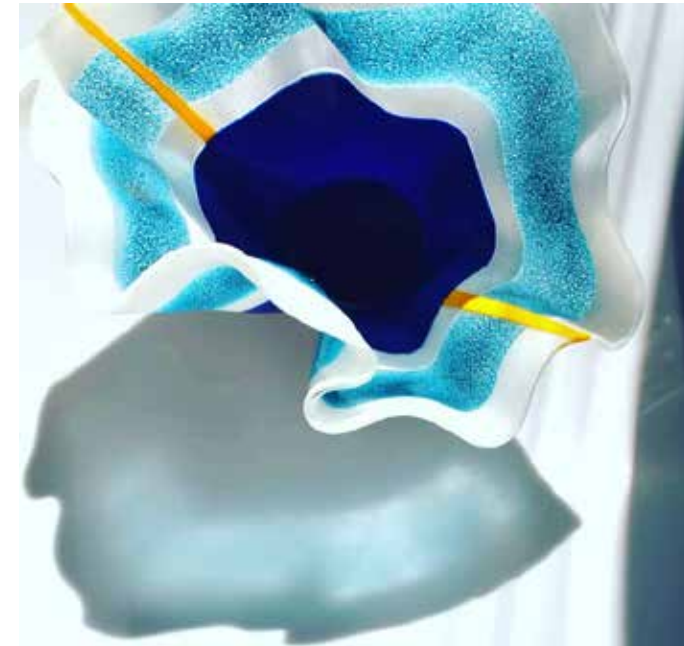

Oxides and Precious Metals collection:

Oxides and Precious Metals focuses on surface textures and colors. I create the surprising surfaces by pressing different metals between layers of glass.

The work deals with the resolution of contrasts and tensions.

Deák Design Oxides and Precious Metals

Size: Height, Variable 23-26 cm. Its width also varies: 35-40 cm and 12-25 cm

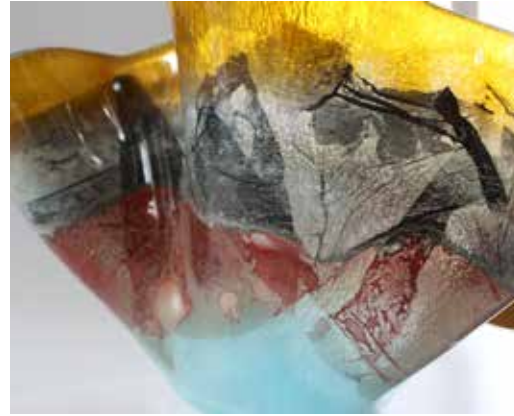

370 EUR/pcs

Product produced in limited quantities.

Deák Design Oxides and Precious Metals
